

Shenzhen Shomea Hardware Products Co., Ltd. is a one-stop customization expert for micro metal tube assemblies, specializing in medical-grade precision tubing production, with supporting processes including laser marking, precision welding, mirror polishing, and professional medical surface treatment. From drawings to samples, we tailor high-precision, high-safety, and highly compliant stainless steel needle solutions for you, empowering innovative medical devices to break design boundaries!

Submit your drawings or samples now to get exclusive customized services — let every needle become a benchmark of medical precision.

Shenzhen Shomea Hardware Products Co., Ltd. is a one-stop customization expert for micro metal tube assemblies, specializing in the R & D and production of medical-grade stainless steel needles for IVD (In Vitro Diagnostics), with supporting processes including laser marking, precision welding, mirror polishing, and professional medical surface treatment. From puncture needles, sampling needles to reaction system needles, we provide IVD equipment with high-cleanliness, high-precision, and high-compatibility needle solutions, helping your diagnostic reagents/instruments achieve “precise detection, safe and worry-free”!

Submit your drawings or samples now to get IVD-exclusive customized services — let every needle become the “lifeline” of detection precision.

Shenzhen Shomea Hardware Products Co., Ltd. is a one-stop customization expert for micro metal tube assemblies, specializing in the R & D and production of medical-grade precision stainless steel tubes, with supporting processes including laser marking, precision welding, mirror polishing, and professional medical surface treatment. From puncture catheters, drainage tubes to endoscope component tubes, we provide medical equipment with high-cleanliness, high-precision, and high-biocompatibility tube solutions, helping your device designs overcome the dual challenges of “precision and safety”!

Submit your drawings or samples now to get exclusive customized services for medical-grade stainless steel tubes — let every tube become a “guardian line” of medical safety.

Specializing in core shaft and needle components for orthopedic instruments. Utilizing medical-grade stainless steel and micron-level CNC, we achieve $\pm 0.01\text{mm}$ tolerances and $Ra \leq 0.4\mu\text{m}$ surface finish. Offering high rigidity, biocompatibility, and military-grade QC, we provide the precision hardware foundation for global medical partners.

Shenzhen Shomea Hardware Products Co., Ltd. focuses on precision hardware parts customization, using advanced five-axis engraving machines to strictly control tolerances within $\pm 0.005\text{mm}$, capable of processing holes with diameters as small as 0.2mm. Our products are widely used in high-precision fields such as medical equipment, aerospace, watches, and robotics. From miniature shafts to complex structural parts, we help you achieve manufacturing breakthroughs of “extremely small size, extremely high precision”.

Welcome to customize with drawings — let every precision part become the “core competitiveness” of your product performance!

SHOMEA

One-Stop Custom Specialist

Crafted from medical-grade stainless steel and titanium alloy, and manufactured with micron-level precision technology, we produce core components such as bone screws, joint replacements, and surgical instruments. Our products combine excellent biocompatibility with superior corrosion resistance. With ultra-high surface cleanliness ($Ra \leq 0.4\mu m$) and anatomical-level precision, they significantly reduce clinical infection risks and enhance implant stability. Adhering to a "zero-defect" standard, we provide safe and precise foundational support for orthopedic surgery, serving as your trusted guardian of bones.
